## **DETAILED ACTION**

## Restriction / Election

1. This application contains claims directed to the following patentably distinct species of the claimed invention: One species, figure 22A, 22C and 22D, is an electrode arrangement wrapped in a circular manner. A second species, figure 22B, is an electrode arrangement wrapped in a helical manner. A third species, figures 22E and 22F, is an electrode arrangement including a base structure.

In addition, each of species one through species three includes at least one of the following patentably distinct species of electrodes: A fourth species, figure 23, is an electrode having a serpentine shape. A fifth species, figure 24, is an arrangement where the electrodes are substantially orthogonal to the wrap direction. A sixth species, figure 25, is elongate electrodes parallel to each other. A seventh species, figure 26, 27, and 28, is an electrode arrangement of individual circular electrode pads/ concentric electrode pads/ including a control chip. An eighth species, figure 29, is an electrode arrangement including a collar support. A ninth species, figure 30, is an electrode arrangement including electrode ribs. A tenth species, figure 31, is an electrode arrangement including two coaxial disposed coil leads separated into two separate coils. An eleventh species, figure 32, is an electrode arrangement including a cable body formed in a curvilinear shape prior to implantation.

The Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of species one through three for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. In addition, further election of an appropriate

Art Unit: 3762

64.20

species of electrode, as defined in species four through species eleven, is further required.

Currently, there are no claims that are deemed to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

\*\*\*

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frances P. Oropeza whose telephone number is (703) 605-4355. The examiner can normally be reached Monday through Friday from 9 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela D. Sykes, can be reached on (703) 308-5181.

The telephone number for facsimiles for regular communication and After Final communications is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is (703) 308-0858.
